ENERGY INFRASTRUCTURE

F R A N C H I S E O P P O R T U N I T Y

Own the Energy.
Build the Future.

AURIX Core 50 — Buffered 50kW DC Fast Charging. Franchise-Owned. Community-Powered.

Powered by ALIFE AIR

AURIX

ENERGY INFRASTRUCTURE

THE VISION

Decentralizing Energy. Empowering Entrepreneurs.

OUR MISSION

To mobilize the largest global DC fast charging network — with the help of everyday entrepreneurs.

We believe the future of mobility should not be limited by grid constraints, infrastructure delays, or capital concentration.

The future should be participatory — owned by communities, not corporations.

What AURIX Represents

- ▶ Energy buffering & intelligent flow
- ▶ Distributed network connectivity
- ▶ Three-phase infrastructure balance
- ▶ Sustainable community reach

"Together, we scale faster. Together, we grow sustainably."

— AURIX Mission Statement

AURIX Core 50

Buffered 50kW DC Fast Charging — Deployed from Standard 13A Input

Key Technical Advantages

- ▶ Operates on standard 13A household input
- ▶ 50kW DC fast charge output
- ▶ On-board energy buffer — no grid upgrade needed
- ▶ Rapid deployment — no major electrical works
- ▶ Intelligent energy management system

Reduced Grid Dependency

No heavy infrastructure upgrades required. Deploy where others cannot.

Faster Deployment

From agreement to live node in significantly shorter timelines.

Lower Installation Barriers

Simplified site approval process — residential and commercial friendly.

Greater Neighbourhood Reach

Reach underserved communities, residential areas, and small businesses.

Digital Backbone

Every node connects to secured cloud infrastructure with real-time performance tracking, revenue dashboard, automated settlement, and 24/7 remote monitoring.

Platform Services Included

- ▶ Cloud-based monitoring system
- ▶ Secure encrypted data management
- ▶ Integrated global payment gateway
- ▶ Automated transaction processing

Operator Support

- ▶ 24/7 technical monitoring
- ▶ Remote diagnostics & firmware updates
- ▶ Back-office revenue reconciliation
- ▶ Installation guidance & onboarding

THE OPPORTUNITY

Start Small. Scale Smart.

We encourage responsible growth. Begin with a single node, build community presence, then expand systematically.

SCENARIO 1

Single Node Operator

6 sessions/day × 20 kWh

120 kWh/day · 3,600 kWh/month

Revenue = 3,600 kWh × Local Charging Rate

Net Income = Revenue - Electricity - Platform Fee

SCENARIO 2

Multi-Node Expansion

3–5 Stations

Revenue scales linearly with nodes

Centralized Dashboard — Single Oversight

Growth becomes systematic, not speculative.

WHY FRANCHISE?

Decentralize. Participate. Earn.

Instead of centralizing infrastructure ownership, we are decentralizing it. Every AURIX Core 50 node is an opportunity — for local entrepreneurs to own infrastructure, build recurring income, and accelerate EV adoption.

- ▶ Own infrastructure assets
- ▶ Build recurring income streams
- ▶ Contribute to cleaner mobility
- ▶ Accelerate neighbourhood EV adoption

Important Disclaimers

All revenue projections are illustrative examples only. Actual financial performance varies by location, electricity tariff, utilization rate, regulatory environment, and market conditions. No guarantee of income or profitability is expressed or implied. Franchise participation subject to approval and agreement execution.

M U T U A L G R O W T H M O D E L

Your Success Is Our Success.

We do not simply sell hardware. We collaborate.

ALIFE AIR Provides

- ▶ Full hardware supply
- ▶ Installation guidance
- ▶ Cloud-based monitoring system
- ▶ Secure encrypted data management
- ▶ Integrated global payment gateway
- ▶ Automated transaction processing
- ▶ Back-office revenue reconciliation
- ▶ 24/7 technical monitoring
- ▶ Firmware updates & remote diagnostics

You Focus On

- ▶ Securing the location
- ▶ Community presence & relations
- ▶ Managing expansion timing
- ▶ Entrepreneurial growth strategy

Settlement Flow

Platform fees and electricity costs are reconciled automatically. Net earnings are transferred per settlement schedule directly to your account.

A S U S T A I N A B L E N E T W O R K V I S I O N

Each Node Strengthens the Network.

As charging density increases, EV drivers gain confidence, accessibility improves, adoption accelerates, and ICE vehicle reliance declines. This is not only an income opportunity — it is infrastructure participation in the global energy transition.

Join the Movement

Start with one node. → Grow to five. → Build a neighborhood network.

Own the Energy. Build the Future.
